Cybersecurity Awareness Training Made Easy

2.1 million trained learners and counting

One Product, Endless Capabilities

Everything you need to improve security behaviours and reduce cyber incidents caused by employees.

We help you build a cyber-sharp workforce to stay compliant and avoid loss.

From awareness to action, our mission is to build a security-first culture that changes behaviour for good.

Why Should You Care?

1. 95% of cybersecurity breaches are simple slip-ups, not hacker magic. These aren't tiny whoopsies—they're billion-dollar blunders.

2. For every $1 spent on Security Awareness Training, organisations save $3.50 in breach costs.

Tech overload isn't the answer. It's about making your team cyber-sharp. *That's where Goldphish slides in.*

Understanding Our Offering

goldphish | premium
Run your own annual security awareness programme.

goldphish | managed
The power of premium but managed for you.

goldphish | content
Your LMS, our content.

How Does It Work?

Train, Phish, Report, Measure

Awareness Training
More than just training; it's a shift in human behaviour. Build a security-first culture that lasts.

Simulated Phishing
The freedom to deploy consistent training all year round.

Measurable Impact
Deep-dive into your team's progress and performance. Spot trends, behaviours, and take action.

Compliance Made Easy
Our platform helps you tick those compliance boxes with ease.

One Product, Endless Capabilities

- Unlimited training campaigns
- Unlimited simulated phishing campaigns
- Full progress + performance reports
- Phishing email template builder
- Fun, content-rich library
- Campaign scheduling
- Phishing reporting tool
- White-labelled platform

Our training is accredited by the UK's National Cyber Security Centre (NCSC).
